MOVING LIGHT / FADER DESKS FEATURE BENEFITS

General: The **maXim-LP**, **maXim-XLP** and **maXim-XXLP** are the hybrid desks in the **maXim** family offering a fully featured **conventional lighting desk** *fully integrated* with the powerful **PatPad moving light controller**, capable of controlling up to 60 moving lights. Operation is simple yet the **PatPad** contains most of the features found in expensive dedicated controllers allowing advanced users to program complex shows— An inbuilt **effects engine** and “**fan**” menu allows stunning effects to be created with a few simple keystrokes.

6 touch pad Displays (virtual wheels) for parameter control.

Displays can show parameter “**Name**” “**Value**”, “**Time**” or “**Flags**”

Select and control up to **60 fixtures**.

Built in **effects engine** and automatic **fanning** of fixtures.

SVGA colour video for fixture info, desk output, memory information and multi-lingual “**Help**” screens.

In built universal power supply with **brown-out protection** and Auto-Save on power loss.

Standard **Disk Drive** for saving and loading shows, and for upgrading software

Two DMX universes (1024 channels) with *fully proportional* softpatch.

PatPad

Select up to 4 parameters per displayer for a total of **24 parameters**.

Clever flashing of **Multi colour LED's** shows which parameters are involved in PatPad operations.

Comprehensive controls for **Filters, Palettes, Presets, Cloning, Groups, Storing, Lock Home**, etc.

Extensive built in **fixture library** with Web updates.

In “**Scene mode**”, Red bank faders provide 9 more pages of **Playbacks**

Dedicated Playbacks for scenes and chases with 9 pages of memory.

Separate In and Out **Time Masters**.

Theatrical style **Stack** with up to 500 steps and direction, pause and **GO** buttons.

Up to 90 **simultaneous** playbacks.

Fully integrated PatPad
