

LSC Lighting Systems booth at PLASA this year will see the production launch of the exciting NEW Clarity LX600 & LX300 lighting and media control consoles. The LX300 was released to the market in June however this will be the first international showing of the production LX600.

The new LX600 will arrive in style at PLASA on Monday with a gold medal from its inaugural sports day show in East London.

Designed in conjunction with Open Clear, CLARITY LX consoles will be shown and supported by several renowned lighting operators who are taking time out from their world touring schedules to be on-hand. They will offer demonstrations, answer questions and explain why they have chosen to work with this exciting and powerful new range of consoles.

Also NEW for PLASA is the EKO TRUPOWER installation dimmer that offers dimming or power switching on each and every circuit and can be monitored and controlled from remote software.

For the budget conscious, the REDBACK install range also on show features the same Australia made quality and reliability with a simpler feature set.

LSC Lighting Systems can be found at PLASA 2012 on booth 2-Q22 in the White Light Zone, Earls Court 2.
